

TRIO FTC ERGO-LIGHT PIN BONE REMOVER

For Fresh and Cold smoked fillets.

The leader in Pin Bone Removal technology

FTC ERGO-LIGHT PIN BONE REMOVER

FTC Ergo-Light Pin Bone Remover has been developed to remove pin bones in fresh/defrosted/cold smoked fillets.

FTC introduces the patented modular Ergo-Light Pin Bone Remover(PBR) with speed and pulling power control and a unique mechanical picking action which gently removes pin bones from nearly all fresh, defrosted and cold smoked fillets.

The FTC Ergo-Light Pin Bone Remover is air powered and has been developed and tested to meet even the harshest working conditions.

FTC Ergo-Light Pin Bone Remover in automated pin boning line

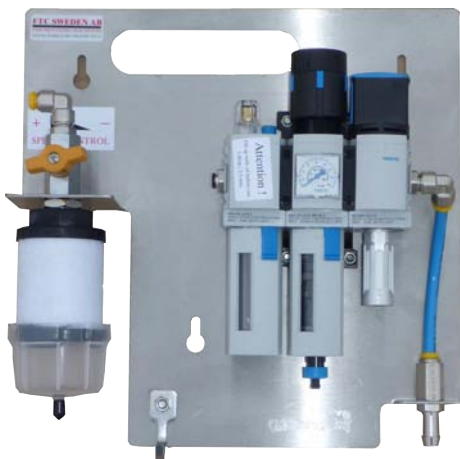

The FTC Ergo-Light Pin Bone Remover can be used for neck bones and pin bones left in the fillet after automatic pin boning. The FTC Ergo-Light Pin Bone Remover will have a higher productivity than pliers.

FTC Ergo-Light Pin Bone Remover is widely used for after control in processing line.

FTC experience and know how

In 1986 FTC initiated the original concept of automatic pin bone removal. Since this time we have continued the development of our equipment in close cooperation with the global seafood market. Our understanding of the products and industry challenges are unrivalled and for this reason Trio FTC are market leaders in the field of pin boning technology.

Supplied with Air Control Panel

Gentle touch, least damage to fillet.

TECHNICAL SPECIFICATIONS

FTC ERGO-LIGHT PIN BONE REMOVER

OPERATORS
1 PERSON

DIMENSION:
L: 230 MM
W: 70 MM
H: 57 MM
